

## **LinkMotion and Vinyl Express 6.6 from Flexi:**

Install LinkMotion driver software, check all settings, and finally launch Flexi's Vinyl Express application.

### **Important notes:**

**Zero or thinnest line width and No fill are the most important things to remember when you are designing a file for Vector output. Do not fill the shape for any vector output.**

**Raster will have the fills and it is used mostly for the laser output.**

**Solustan tests the primary function of accepting hair lines (vector lines) from the third party application software to make the vector moves on the machine using LinkMotion driver. Solustan may test additional functions. However, it is not a detailed testing. The developer and marketer of the third party software make changes to their applications quite often. It is the responsibility of the user to make sure that the necessary functions are available while making the choice of off-the-shelf application software.**

**Solustan's liability is limited to the purchase price of the LinkMotion driver software.**

It is necessary for the user to own the application that will be used for the job design. There are many books of various levels available for all these popular applications. This document is simply a guideline to point the user in the right direction. We welcome feedback from our users. Share your findings with us and we will include them here for all users benefit.

### **(1) How to do quick and simple settings?**

Launch **Vinyl Express 6.6** application.

Open and select **Custom page size**. Plug in X and Y dimensions as your table size for the custom page size.

Select No fill and Hairline or 0.00" line thickness for stroke.

Check Wireframe selection in the print dialog box. Make sure your selected machine name (Machine name that you selected when you installed LinkMotion) is selected as the printer driver name. Scaling should be 100% with 1: 1 ratio. Paper size should be selected to be Table Size. Now when you click print it should send the output to your machine.
